

Synthetic large document page 1: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 2: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 3: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 4: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 5: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 6: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 7: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 8: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 9: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 10: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 11: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 12: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 13: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 14: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 15: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 16: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 17: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 18: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 19: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 20: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 21: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 22: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 23: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 24: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 25: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 26: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 27: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 28: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 29: binary search has $O(\log n)$ time on sorted input.

Synthetic large document page 30: binary search has $O(\log n)$ time on sorted input.
